

LPS Series

Portable Shipping Scale

LPS Series Portable Shipping Scales are particularly suited to shipping and warehouse applications and general purpose weighing. These are very affordable scales with high accuracy (non-legal for trade).

The dual power modes (battery and AC adapter) enable portability or permanent installation.

A large, simple to read display can be wall or stand mounted for easy visibility and the large keyboard switches work with gloved hands.

The indicator cable is a coil style for durability and easy extension to the wall or desk mount display.

The LPS Scale comes standard with RS-232 port and interfaces to most common shipping software, including UPS™ Worldship Online.

A durable low profile platform allows for easy weighing. It is a low cost yet versatile and portable scale. Suitable for shipping/receiving, mailroom, manifest systems and general purpose weighing applications.
