

ONE SCALE. TWO CAPACITIES. SMART PRECISION.

By automatically adjusting resolution across two capacity ranges, the LPS Bench Scale ensures accurate weighing whether the load is small or large - eliminating the need for multiple scales.

Versatile and robust, these portable scales feature a rust-proof stainless-steel top, a low-profile base, and an indicator housed in durable ABS and steel. Designed for environments with limited space, the LPS scales are ideal for shipping and receiving areas, as well as catering and animal-care applications.

Each scale includes a standard RS232 port for printing data or interfacing with UPS/NCI shipping software. The convenient Hold Weight mode freezes the last weight shown on the screen, allowing for hands-free operation. Dual power options - battery and AC adapter - support portable use or permanent installation on a wall or desk (brackets included).
